of the Philippine Medical Association*

2017 ANNUAL CONVENTION

BREAKING

BARRIERS

Novotel Manila Araneta Center

April 23-25, 2017

Philippine College of Emergency Medicine, Inc.

HISTORY

It was in early 2009 that the Philippine College of Emergency Medicine and Acute Care (PCEMAC) and the Philippine Society of Emergency Care Physicians (PSECP) began the process of merging into a single national specialty society for Emergency Medicine, with the encouragement and guidance of the Philippine Medical Association.

A Steering Committee was organized to work towards the merger of the PCEMAC and PSECP. After several meetings, the Philippine College of Emergency Medicine (PCEM) was born.

On January 17, 2011, PCEM received official notice of its recognition as a Specialty Society under the Specialty Division of Family Medicine from Dr Alex Alip Jr., executive secretary of the Philippine Academy of Family Physician.

VISION

The national academic body composed of dedicated professional emergency medicine physicians oriented towards quality service; research and training in emergency care, working together towards global recognition.

MISSION

- To achieve national recognition as a distinct specialty in medicine.
- To promote emergency care to its highest standard nationwide.
- To regulate the practice and training of emergency medicine.
- To participate in disaster planning and pre-hospital care.
- To innovate emergency medicine practice through research and continuing medical education

Philippine College of Emergency Medicine, Inc.

FOUNDING FELLOWS

These doctors are being honored for their invaluable contribution to the establishment and advancement of the practice of Emergency Medicine in the Philippines. Their passion serves as an inspiration to all members to achieve the college's mission and vision.

MESSAGE

My warmest greetings to the **Philippine College of Emergency Medicine, Inc. (PCEM)** as it holds its **Annual Convention**.

Our country is facing many challenges that endanger the lives of our fellowmen. Recent tragic events brought by natural calamities have caused so much devastation. This must be taken into consideration in our pursuit of securing the health and well-being of our people.

I laud the PCEM for its unwavering commitment to keep our doctors and other healthcare professionals abreast with current trends and techniques in the field of emergency medicine. By sharing new ideas and innovations, we can gain more knowledge that will help us to effectively respond to the needs of public.

I am glad that we have individuals and organizations like yours that remain steadfast in safeguarding the welfare of our people during disasters and accidents. With you at our side during times of emergencies, I am confident that we can save more lives.

I wish you a productive convention.

RODRIGO ROA DUTERTE

MANILA
23 April 2017

THE PRESIDENT OF THE PHILIPPINES

Republic of the Philippines
Department of Health
OFFICE OF THE SECRETARY

MESSAGE

Warm greetings to the Philippine College of Emergency Medicine on holding of its Annual Convention!

These past years of health sector reform, the Department of Health implemented key structural reforms and innovations, continuously building on programs that bring us closer to our aspirations. And yet, inequities in health outcomes persisted. Health care costs remained restrictive and impoverishing.

In pursuing better health outcomes, the Department of Health wants to guarantee services that provide care for all life stages, ensure that these services are accessible in functional service delivery networks, and sustainably finance these through universal health insurance.

These are all contained in the Philippine Health Agenda (2016-2022) where we hope to leave the following legacies: a reduction in out-of-pocket expenditures for health and medicines for the poor, and in the malnutrition rate; the attainment of universal health insurance coverage for all Filipinos, blood adequacy, zero unmet need for modern family planning, and zero open defecation; the establishment of community-based rehabilitation program in all communities, ISO in all government hospitals, and 24/7 access to health services for all Filipinos. We would also like to see the HIV/AIDS trend reversed, good data for decision-making utilized, and government and private sector spending for health increased. This means that, by 2022, all seventy DOH hospitals will be ISO-certified and linked to the Philippine Health Information Exchange to enable access to medical records.

The DOH recognizes your organization's initiative in updating your member-practitioners of current trends, knowledge and techniques, as well as challenges in emergency medicine that will, ultimately, redound to better health outcomes for your patients.

Let us all work together to achieve our shared vision for the Filipino: **All for Health towards Health for All!** *Mabuhay tayong lahat!*

PAULYN JEAN B. ROSELL-UBIAL, MD, MPH, CESO II
Secretary of Health

ALL FOR HEALTH
TOWARDS
HEALTH FOR ALL

Message

Warm greetings from the Philippine Medical Association!

*It is with a distinct honor and a privileged for me, to convey my heartfelt felicitations to all the officers and members of the Philippine College of Emergency Medicine (PCEM) on the holding of its Annual Convention on April 23 to 25, 2017, at the Novotel Manila Araneta Center, Quezon city with the theme entitled: **"Breaking Barriers"**.*

When we "break barriers", it is my understanding that we move and act beyond the constraints of the status quo. In today's dynamic and changing world, medical science and technology continue to evolve, at a rapid phase, with the discovery of new breakthroughs and innovative approaches in the management of what use to be challenging cases in the delivery of emergency services, be it in a pre-hospital setting or within the confines of health facilities. It delights me, therefore, to know that the organizers have crafted the program of scientific activities designed to engage all health professionals in a discourse about the updates and controversies in the emergency room setting and to keep them abreast, as well, with the current trends, knowledge and techniques in the vast practice of emergency medicine. I would like to congratulate the officers and organizers of this year's gathering for the successful realization of this event.

On behalf of the Philippine Medical Association, I would like to reiterate my warm regards and best wishes to the members of the PCEM Board and all the participants of your convention. More power and Mabuhay!

IRINEO C. BERNARDO III, M.D.
President

MESSAGE

On behalf of the Philippine Academy of Family Physicians, we congratulate you in your pursuit of academic excellence through this convention. It is very timely that you chose the theme "Breaking barriers" as this will enable emergency physicians deal with challenges in your field of practice. Let's help the Filipino families attain quality health care at the doorstep of any hospital emergency room.

This annual convention you are conducting will help promote high standards and chain of care concept in Emergency Medicine to be able to act as a safety net for the community.

As you embark in this journey, may all your activities and projects be able to benefit your members as well as the patients and their families.

Good luck!

Sincerely yours,

Eva Irene Yu Maglonzo, MD, FPAFP, FPCGM, MHPEd

INTERNATIONAL FEDERATION FOR EMERGENCY MEDICINE

Message from IFEM President, Professor Lee Wallis for PCEM Annual Conference 2017

As a member of the International Federation for Emergency Medicine, the Philippine College of Emergency Medicine enjoys close links with other emergency physicians from over 60 countries around the world. Sharing resources and fostering international cooperation is an important way to break down the barriers.

On behalf of the Federation, I wish the College every success in 'Breaking Barriers' at its Annual Convention and hope it continues to build Fellowship amongst your colleagues as well as those from around the world.

28 February 2017

Dr Amado A. Flores, MD, FPCEM
Chairman, Annual Convention Committee

Dr Carlos Vicente G. Gabriel, MD, FPCEM
President, Philippine College of Emergency Medicine

On behalf of the Asian Society for Emergency Medicine (ASEM), I would like to congratulate the Philippine College of Emergency Medicine (PCEM) for this year's convention, entitled "Breaking Barriers".

This exciting 3-day convention focuses on encouraging Emergency Medicine physicians to surpass physical barriers in delivering quality emergency medical care. With a comprehensive and extensive programme, this year's convention brings together physicians, nurses and other healthcare professionals in a national forum – enabling the exchange of the latest advancement in medical technology and services as well as updates on the relevant health concerns pertinent to the Philippines. The with topics, such as: the Controversies of Sepsis – 3, new developments in Trauma management, as well as Infection Prevention and Prophylaxis, addressed by the esteemed panel of speakers, this year's convention takes a multifaceted approach to empower medical practitioners and healthcare professionals alike in the field of Emergency Medicine.

It is with great pride that PCEM organises this annual convention to promote health awareness within the Philippines in the beautiful city of Manila. Manila is home to an extensive array of commerce, rich cultural and historical charm and warm, wonderful hospitality – the perfect location for an unforgettable convention.

To all participants, I wish you a fruitful and fulfilling experience at "Breaking Barriers".

Yours sincerely,

Associate Professor Lim Swee Han (MBBS, FRCS (A&E) Edin, FRCP Edin, FAMS)
Honorary Secretary, Asian Society for Emergency Medicine

Philippine College of Emergency Medicine, Inc.

Member, International Federation of Emergency Medicine (IFEM)
Member, Asian Society for Emergency Medicine (ASEM)*

Message from PCEM President

Welcome to the 2017 Philippine College of Emergency Medicine Annual Convention, Breaking Barriers.

Emergency medicine is a broad field of practice involving many disciplines and cross-cutting themes. Unlike many other areas of medicine, which tend to be defined by types of conditions or organ systems, emergency medicine is uniquely defined by the urgency and location of treatment. The fact that emergency care defies easy description has proven to be just one of the principal challenges facing the field.

We are not strangers to the challenges associated with the practice of emergency medicine. We break barriers every day -- the quality and speed of the care that is provided in the relatively brief emergency care encounter can mean the difference between life and death.

This conference recognizes the major and significant role our practitioners play in stemming these challenges. Not only will we honor a new batch of diplomates and fellows, this conference will celebrate the camaraderie and dedication we all share. Throughout the conference, we shall have presentations and research papers on cases and issues most relevant to our practice. We have designed a comprehensive program consisting of tracks that will appeal to a broad spectrum of medical professionals as well as healthcare industry leaders and managers.

We are confident that this year's convention lends a great opportunity for everyone to interact, exchange ideas and network for potential future collaborations. We are grateful that your support has made our annual convention a hallmark fixture that you all look forward to attending yearly.

On behalf of the Philippine College of Emergency Medicine, we thank you for your participation and contribution to the success of this year's convention!

Carlos Vicente G. Gabriel, MD, FPCEM

BREAKING BARRIERS 2017 PCEM ANNUAL CONVENTION CHAIRMAN

MESSAGE

Bold and beyond! These two words best describe the intensity of what Breaking Barriers is all about.

It all started with a simple dream, a simple goal. To deliver the Philippine College of Emergency Medicine 2017 Annual Convention in a manner that you, our participants, take home and share an experience of a lifetime. With the inspiration of the spirit of the living God, we were able to gather the best team of passionate and dedicated individuals who share a common vision of a recognized world-class emergency medicine society, living in the essence of promoting quality emergency medical care in our country. Our mission was to go beyond the ordinary by conceptualizing a great theme, Breaking Barriers. A theme that is bold to tackle current issues and controversies in our practice. We have prepared an interesting and cohesive scientific program and hands-on workshops. We want to showcase the latest trends, innovations and advancement in the emergency medicine field and at the same time share the fun and excitement of being reunited with our friends, our colleagues and our extended family.

With God first, I would like to express my sincerest appreciation to the following:

To the annual convention committee members who shared themselves tirelessly and beyond capacity, no words can explain how you have inspired us and helped us achieve another success.

To our loyal partners in the health care service, we thank you for always believing and sharing your blessings with us. Our growth is yours as well. We hope that you continue to be part of the emergency medicine family and be our lifelong partners.

To you, our participants, we dedicate Breaking Barriers with all our heart. Your participation is the core of this success.

We welcome you once again but at the same time leave you with a challenge to achieve more by being bold and beyond in BREAKING BARRIERS.

Maraming Salamat Po!

BARRIERS

KEYNOTE SPEAKER

JOHNNY B. SINON, MD, FPCEM

Dr. Johnny Sinon is an Emergency Medicine Physician, one of the first and finest, practicing at Makati Medical Center.

In this same institution where he also completed his Residency Training and served as Chief Resident, he spent about 30 years of his clinical experience. He was President of the Medical Staff Association of Makati Medical Center, as well as Head of the Health Hub, having held key positions such as Chairman of the Department of Emergency Medicine and Head of the Emergency Department. He was also the Medical Director of a global medical and travel security assistance organization, International SOS.

A graduate of Doctor of Medicine from the University of Santo Tomas Faculty of Medicine and Surgery, he served as Personal Physician to His Excellency President Fidel V. Ramos during his Official and State Visits.

He has earned units for Masters in Hospital Administration, from the Ateneo Graduate School of Business. Currently he is also earning units for Masters in Management, Major in Hospital Administration from Philippine Christian University. He lectures on various topics in Emergency Medicine in national conventions and medical symposia.

Dr. Sinon is a Fellow of the Philippine College of Emergency Medicine, pioneer of Emergency Medicine in the Philippines and is currently the Medical Director of Makati Medical Center.

Breaking the Bug: A Discussion on the Controversies of Sepsis-3

MA. TARCELA S. GLER, M.D.

- Dr. Maricelle Gler is an Infectious Disease Specialist practicing in Makati Medical Center.
- Fellowship in Infectious Disease at Makati Medical Center, Makati City
- Observer at the Infectious Disease Section, Mayo Clinic, Rochester, Minnesota, USA
- Certified in Epidemiology from the University of Iowa, Iowa City, USA

WORLDWIDE REACH. HUMAN TOUCH.

GLOBAL MEDICAL CAREERS FOR FILIPINO MEDICAL PROFESSIONALS

International SOS (www.internationalsos.com) is the world's leading medical and travel security risk services company. We have pioneered a range of preventive programs and offer unparalleled response to emergencies or routine care for our client members across the globe, from more than 700 locations in 89 countries. We have over 10,000 corporate clients, and serve 81% of the Fortune Global 100 and 61% of Fortune Global 500 companies.

Our Project membership and Medical Staffing services are specifically designed to help our clients in oil and gas, mining, and infrastructure sites maintain healthy workforce and ensure continuity of day-to-day operations.

We provide them with dedicated medical assistance and customized response plans through our global network of 4,600 medical professionals – ranging from single on-site paramedic, to a full medical team including general practitioners, emergency-trained doctors, Advanced Life Support (ALS) medics, nurses, laboratory technicians, pharmacists, administrators, etc.

Wherever our medical experts are deployed, they can rely on the 24/7 support of our team in the Assistance Centres, medical directors and quality assurance teams to help supervise and manage their medical cases and operational needs at the project site. During critical incidents, we deploy our medical resources to provide on-the-ground assistance to members as part of crisis response.

International SOS has been present in the Philippines for more than 15 years, providing support to our members around the region through our locally POEA Accredited partner. We now employ over 160 Filipino medical professionals who are based around the world, working on a fixed rotation and enjoying the benefits of life at home matched with a rewarding global career with International SOS.

What science can do

AstraZeneca 

At AstraZeneca, each and every one of us is bold in the belief that science should be at the center of everything we do. We push the boundaries of science to create innovative medicines that address multiple cardiovascular risk factors and diseases, offer individualized approaches for diabetes patients, treat chronic kidney disease, and ultimately save lives.

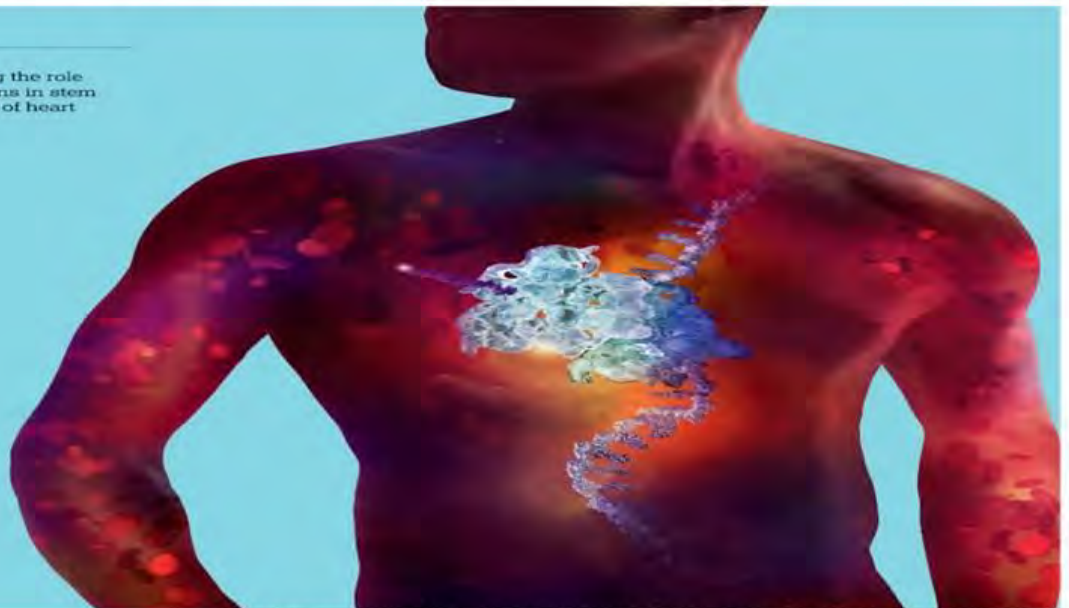

The future of treatment for many of today's diseases lies in uncovering mechanisms that are newly emerging or are still to be discovered. We believe the best way to help patients is to focus on breakthrough science to discover these mechanisms and develop novel, targeted therapies that interact with them.

This is at the heart of our business and our purpose as a company: to push the boundaries of science to deliver life-changing medicines.

Triumphs that are life changing come from a place of hope and healing...

Dr. Marc, Dr. Martin, and Dr. Erick are Asian Hospital's Emergency Medicine doctors. Practicing their specialty in a setting that requires the highest intensity of care is definitely hardwork. However, this is their professional calling and the opportunity to practice in an institution that supports exceptional patient care is a reward like no other.

"Working in Asian Hospital is somehow a challenge but like any other challenge, there's always a reward. At the end of the day, it is always a meaningful and heartwarming experience because the patients show immense gratitude."

MARC LAMBERTO C. REYES, MD
Department of Emergency Medicine

"Each patient that you see is actually a good experience. The appreciation that they show us doctors on how we extend or render our services to them – that really hits me a lot."

MARTIN EUGENE ANTHONY S. LUNA, MD
Department of Emergency Medicine

"Seeing the faces of the patients light up and the big wow when they enter the hospital because it's a world-class institution – that gives me a sense of satisfaction."

RHODERICK V. TIONGSON, MD
Department of Emergency Medicine
